PAI 5 May, 2025

Danske Invest Allocation Basic 20 is committed to consider the principal adverse impacts of its investments as further outlined in the prospectus of the fund. The fund is also committed to disclose information on the measured average impacts for the financial year within the annual report. We further refer to information in the fund's prospectus and annual report available at https://documents.danskeinvest.com/fund/LU1806382021

Principal adverse impacts are the negative, material or likely to be material effects on sustainability factors that are caused by, compounded by or directly linked to investments. Sustainability factors refer to environmental, social and employee matters, respects for human rights, anti-corruption and anti-bribery matters. For further information on how Danske Invest Management A/S prioritise and identify principal adverse impacts, please see the disclosures available at https://www.danskeinvest.lu/page/responsible\_investments\_insight.

This publication shows the principal adverse impacts on sustainability factors measured for investments in Danske Invest Allocation Basic 20 on March 2025 on the basis of mandatory indicators and certain other indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The methodologies and data sets applied for the measurement of adverse impacts in this publication are similar to those used in the annual report for Basic 20. However, as calculations and data are refined on an ongoing basis certain deviations might be expected. Also, where the annual report is based on the average impacts measured throughout the year, the impacts outlined in this publication reflect the impacts as measured at the end of March 2025.

The measurement of principal adverse impacts relies on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. This affects a potential margin of error in the reported figures, which is why the table below also indicates data coverage for each individual indicator. Some indicators have an average value reported. This average is based only on assets with coverage for the applicable indicator. This is done to accommodate for the incomplete coverage on certain asset classes. This means that for the purpose of the calculation, it is assumed that the values for assets with data coverage are representative of the assets where there is no coverage.

At the present time, it is difficult to assess the actual margin of error of the calculations, but we expect it to be substantial.

A reading guide is available here: https://www.danskeinvest.com/docs/sfdr\_pai\_reading\_guide\_en.pdf

Greenhouse gas emissions (GHG)	Mar. 2025	Coverage	Benchmark	Coverage
Scope 1 GHG emissions (tons) Direct emissions from sources that are owned or controlled by the company	931	87.7%	N/A	0.0%
Scope 2 GHG emissions (tons) Indirect emissions from the use of purchased energy	286	87.7%	N/A	0.0%
Scope 3 GHG emissions (tons) All other indirect emissions that occur across the value chain	15,213	87.7%	N/A	0.0%
Total GHG emissions (tons)	16,429	87.7%	N/A	0.0%
Carbon footprint (tCO2e / million of EUR invested)	511	87.7%	N/A	0.0%
