Danske Invest

North America Enhanced Index Fund D (AIF) (FI0008806195)

This fund is managed by Danske Invest Fund Management Ltd, part of the Danske Bank group.

Objectives and investment policy

Objectives

The objective of the fund's investment activity is to achieve a return on the invested assets that outperforms its benchmark index by 0.5-1.0 percentage points in the long term. The fund's benchmark index is the MSCI North America (TR) Index.

The fund is intended for institutional investors who are interested in index-style investment and suits investors who seek high returns, while tolerating substantial value fluctuations or even decreases. Investors may subscribe for and redeem fund units on every banking day.

Investment policy

The assets are invested mainly in an enhanced index fund managed by State Street Global Advisors, whose assets are mainly invested in the equities and equity-linked securities of North American companies. The fund is a non-UCITS fund, whose assets can be less diversified than in an ordinary mutual fund. The returns, such as dividends and interest, will be reinvested. The fund's base currency is the euro.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Benchmark

MSCI North America (TR) Index.

Risk and reward profile

The fund is categorized as 6. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, market risk, exchange rate risk and risk related to investment style or investment area (e.g. funds with more concentrated portfolios). As the fund will invest its assets in the equity markets, the value of the fund may fluctuate according to market conditions.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant

For further details about risk, please refer to the following section in the fund prospectus: "Principal risks of mutual funds."

General trading terms

Orders regarding fund units can be submitted in the manner specified in the section of the fund's regulations entitled "Subscription, redemption and switch of fund units".

Based on their return distribution, fund units are divided into either distribution units or growth units. No return is distributed on growth units; instead, all returns are reinvested in the fund to increase the value of the growth units. In contrast, the aim is that return is distributed annually on distribution units.
